

# Chemical Resistance Charts

## WARNING

The information in this chart has been supplied to Cole-Parmer by other reputable sources and is to be used **ONLY** as a guide in selecting equipment for appropriate chemical compatibility. Before permanent installation, test the equipment with the chemicals under the specific conditions of your application. **For further information, see pages 18 and 19 in this catalog.**

Ratings of chemical behavior listed in this chart apply to a 48-hour exposure period; Cole-Parmer has no knowledge of possible effects beyond this period. Cole-Parmer does not warrant (neither expressed nor implied) that the information in this chart is accurate or complete or that any material is suitable for any purpose.

## DANGER

Variations in chemical behavior due to factors such as temperature, pressure, and concentration can cause equipment to fail, even though it passed an initial test.

### SERIOUS INJURY MAY RESULT.

Use suitable guards and/or personal protection when handling chemicals.

## Ratings—Chemical Behavior

- A – No effect
- B – Minor effect
- C – Moderate effect
- D – Severe effect;  
not recommended
- No data available

# Chemical Resistance Charts

## Ratings— Chemical Behavior

- A – No effect
- B – Minor effect
- C – Moderate effect
- D – Severe effect;  
not recommended
- No data available

**DANGER**

Variations in chemical behavior due to factors such as temperature, pressure, and concentration can cause equipment to fail, even though it passed an initial test.

**SERIOUS INJURY MAY RESULT.**

Use suitable guards and/or personal protection when handling chemicals

The information in this chart has been supplied to Cole-Parmer by other reputable sources and is to be used **ONLY** as a guide in selecting equipment for appropriate chemical compatibility. Before permanent installation, test the equipment with the chemicals under the specific conditions of your application. **For further information, see pages 18 and 19 in this catalog.**

Ratings of chemical behavior listed in this chart apply to a 48-hour exposure period; Cole-Parmer has no knowledge of possible effects beyond this period. Cole-Parmer does not warrant (neither expressed nor implied) that the information in this chart is accurate or complete or that any material is suitable for any purpose.

### Explanation of footnotes:

#### 1. Satisfactory to 72°F (22°C)

## 2. Satisfactory to 120°F (48°C)

# Chemical Resistance Charts

## Ratings— Chemical Behavior

- A – No effect
- B – Minor effect
- C – Moderate effect
- D – Severe effect;  
not recommended
- No data available

## DANGER

Variations in chemical behavior due to factors such as temperature, pressure, and concentration can cause equipment to fail, even though it passed an initial test.

### SERIOUS INJURY MAY RESULT.

Use suitable guards and/or personal protection when handling chemicals.

## WARNING

The information in this chart has been supplied to Cole-Parmer by other reputable sources and is to be used **ONLY** as a guide in selecting equipment for appropriate chemical compatibility. Before permanent installation, test the equipment with the chemicals under the specific conditions of your application. **For further information, see pages 18 and 19 in this catalog.**

Ratings of chemical behavior listed in this chart apply to a 48-hour exposure period; Cole-Parmer has no knowledge of possible effects beyond this period. Cole-Parmer does not warrant (neither expressed nor implied) that the information in this chart is accurate or complete or that any material is suitable for any purpose.

## WARNING

The information in this chart has been supplied to Cole-Parmer by other reputable sources and is to be used **ONLY** as a guide in selecting equipment for appropriate chemical compatibility. Before permanent installation, test the equipment with the chemicals under the specific conditions of your application. **For further information, see pages 18 and 19 in this catalog.**

Ratings of chemical behavior listed in this chart apply to a 48-hour exposure period; Cole-Parmer has no knowledge of possible effects beyond this period. Cole-Parmer does not warrant (neither expressed nor implied) that the information in this chart is accurate or complete or that any material is suitable for any purpose.

## DANGER

Variations in chemical behavior due to factors such as temperature, pressure, and concentration can cause equipment to fail, even though it passed an initial test.

### SERIOUS INJURY MAY RESULT.

Use suitable guards and/or personal protection when handling chemicals.

## Ratings—Chemical Behavior

- A – No effect
- B – Minor effect
- C – Moderate effect
- D – Severe effect; not recommended
- No data available

# Chemical Resistance Charts

## ⚠ WARNING

### Ratings— Chemical Behavior

- A – No effect
- B – Minor effect
- C – Moderate effect
- D – Severe effect;  
not recommended
- No data available

## ⚠ DANGER

Variations in chemical behavior due to factors such as temperature, pressure, and concentration can cause equipment to fail, even though it passed an initial test.  
**SERIOUS INJURY MAY RESULT.**  
Use suitable guards and/or personal protection when handling chemicals.

The information in this chart has been supplied to Cole-Parmer by other reputable sources and is to be used **ONLY** as a guide in selecting equipment for appropriate chemical compatibility. Before permanent installation, test the equipment with the chemicals under the specific conditions of your application. **For further information, see pages 18 and 19 in this catalog.**

Ratings of chemical behavior listed in this chart apply to a 48-hour exposure period; Cole-Parmer has no knowledge of possible effects beyond this period. Cole-Parmer does not warrant (neither expressed nor implied) that the information in this chart is accurate or complete or that any material is suitable for any purpose.

# Chemical Resistance Charts

## WARNING

The information in this chart has been supplied to Cole-Parmer by other reputable sources and is to be used **ONLY** as a guide in selecting equipment for appropriate chemical compatibility. Before permanent installation, test the equipment with the chemicals under the specific conditions of your application. **For further information, see pages 18 and 19 in this catalog.**

Ratings of chemical behavior listed in this chart apply to a 48-hour exposure period; Cole-Parmer has no knowledge of possible effects beyond this period. Cole-Parmer does not warrant (neither expressed nor implied) that the information in this chart is accurate or complete or that any material is suitable for any purpose.

## DANGER

Variations in chemical behavior due to factors such as temperature, pressure, and concentration can cause equipment to fail, even though it passed an initial test.

### SERIOUS INJURY MAY RESULT.

Use suitable guards and/or personal protection when handling chemicals.

## Ratings—Chemical Behavior

- A – No effect
- B – Minor effect
- C – Moderate effect
- D – Severe effect; not recommended
- No data available

# Chemical Resistance Charts

## ⚠ WARNING

### Ratings— Chemical Behavior

- A – No effect
- B – Minor effect
- C – Moderate effect
- D – Severe effect;  
not recommended
- No data available

## ⚠ DANGER

Variations in chemical behavior due to factors such as temperature, pressure, and concentration can cause equipment to fail, even though it passed an initial test.  
**SERIOUS INJURY MAY RESULT.**  
Use suitable guards and/or personal protection when handling chemicals.

The information in this chart has been supplied to Cole-Parmer by other reputable sources and is to be used **ONLY** as a guide in selecting equipment for appropriate chemical compatibility. Before permanent installation, test the equipment with the chemicals under the specific conditions of your application. **For further information, see pages 18 and 19 in this catalog.**

Ratings of chemical behavior listed in this chart apply to a 48-hour exposure period; Cole-Parmer has no knowledge of possible effects beyond this period. Cole-Parmer does not warrant (neither expressed nor implied) that the information in this chart is accurate or complete or that any material is suitable for any purpose.

# Chemical Resistance Charts

The information in this chart has been supplied to Cole-Parmer by other reputable sources and is to be used **ONLY** as a guide in selecting equipment for appropriate chemical compatibility. Before permanent installation, test the equipment with the chemicals under the specific conditions of your application. **For further information, see pages 18 and 19 in this catalog.**

Ratings of chemical behavior listed in this chart apply to a 48-hour exposure period; Cole-Parmer has no knowledge of possible effects beyond this period. Cole-Parmer does not warrant (neither expressed nor implied) that the information in this chart is accurate or complete or that any material is suitable for any purpose.

Variations in chemical behavior due to factors such as temperature, pressure, and concentration can cause equipment to fail, even though it passed an initial test.

## Ratings— Chemical Behavior

- A – No effect
- B – Minor effect
- C – Moderate effect
- D – Severe effect;  
not recommended
- No data available
