

706

RUSTSOLVO™ PENETRATING OIL

APPLICATION AREAS

- Nuts
- Bolts
- Caps
- Screws
- Washers

PRODUCT DATA SHEET

KEY FEATURES AND BENEFITS

- Excellent penetration
- NSF H2 Registered
- Extremely low surface tension
- Creeps into microscopic spaces

PACKAGING

20 L

208 L

DIRECTIONS

Apply by using squirt oiler or oil can with extended spout. Apply evenly and allow a minute for deep penetration. For aerosol option, please see 723 Sprasolvo™ penetrating oil.

DESCRIPTION

Chesterton® 706 Rustsolvo is a high quality, fast acting, penetrating oil which reaches deeply in and frees frozen nuts, bolts, and fittings without injury to the base metal. Due to its excellent capillary action, 706 Rustsolvo can reach inaccessible places other penetrants will not touch. Breakaway torque is significantly reduced as the product penetrates rust, scale, or corrosion and loosens tar, grease, dirt, and deposits of carbon and graphite. Most penetrating oils on the market today are designed for multiple functions- displacing moisture, protecting against corrosion, lubricating, and finally, loosening rusted bolts.

The result is a product that is deficient in deep penetration. Unlike these other products, Rustsolvo 706 is specifically formulated to offer optimal penetration. Use Chesterton 723 Sprasolvo when aerosol packaging is preferred.

TYPICAL PHYSICAL PROPERTIES

Appearance	Blue liquid
Odor	Petroleum
Flash Point	49°C (120°F)
Specific Gravity	0.83

Before using this product, please refer to Safety Data Sheet (SDS).
